

PATIENT RIGHTS

1. The patient has a right to be treated with care and respect.
2. The patient has the right to get complete and current information about (this needs to be in terms they can understand.)
 - the patient's condition
 - treatment
 - what to expect
3. The patient has the right to as much privacy as possible.
4. The patient has the right to know of any relationships this facility may have with any other health care or teaching centers when it comes to their care.
5. The patient has the right to have all letters and records about his case kept private.
6. The patient has the right to have answers for requests in a timely manner
7. The patient has the right to know if they will be part of research that concerns their care or treatment. They have the right to refuse to be a part of research projects.
8. The patient has the right to as much continuity of care as possible
9. The patient has the right to discuss any concerns about patient care with their doctor. Advanced Prosthetics will help patients with solving their problems.
